

VAISHNAVI RAJARAM DHONGADE

Aspiring Data Scientist / Data Analyst

Nashik, Maharashtra, India | +91 9322635592 | vaishnavidhongade001@gmail.com | [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Computer Science Engineering graduate transitioning into Data Science and Analytics, currently pursuing a 6-month Data Science & Machine Learning training program at ExcelR (started July 2026). Building hands-on proficiency in Python, NumPy, Pandas, SQL, statistics, data analysis, machine learning, Tableau, and Generative AI. Combines a strong academic foundation in computer science, databases, cloud computing, and software project management with a self-driven commitment to mastering data-focused tools and techniques. Seeking an entry-level Data Science / Data Analytics role to apply analytical and technical skills in solving real-world problems.

TECHNICAL SKILLS

- Programming & Querying: Python, SQL
- Data Analysis Libraries: NumPy, Pandas
- Statistics & Machine Learning: Statistical Analysis, Machine Learning fundamentals
- Data Visualization: Tableau
- Emerging Tech: Generative AI
- Core CS Foundations: Database Management Systems (DBMS), Cloud Computing, Software Project Management

EDUCATION

Bachelor of Technology (BTech) — Computer Science Engineering

Sandip University, Nashik | CGPA: 8.46

TRAINING & CERTIFICATION

Data Science & Machine Learning Training Program — ExcelR

In Progress | Started July 2026 | 6-Month Program

- Developing practical, project-based skills across the full data science workflow: data cleaning and manipulation with Python (NumPy, Pandas), database querying with SQL, statistical analysis, machine learning fundamentals, data visualization with Tableau, and applied Generative AI.

CAREER TRANSITION NOTE

Leveraging a Computer Science Engineering background — including strong exposure to programming, databases, and cloud computing — to move into a data-focused career. This technical foundation, paired with structured, hands-on Data Science training, provides both the theoretical grounding and practical readiness for an entry-level Data Science / Analytics role.

KEY STRENGTHS

- Strong analytical and problem-solving mindset developed through CS coursework and self-directed learning
- Quick learner, currently balancing structured training with independent skill-building in data tools
- Solid grasp of software fundamentals (DBMS, cloud computing, project management) that support end-to-end data workflows
- Motivated and disciplined approach to a deliberate career transition into Data Science
